LINEACUBE®

create your space at any place

Place it anywhere

I take **transparency** in the office to a new level. At the same time, I enable optimum **concentration** and **privacy** with my **double glazing**.

AL JURAID

Maars has developed the lineaCube as an answer to the increasing demand for cells in open plan offices, to allow people to work, call and meet in a concentrated way. Workspaces with open plan environments have consequences for the degree of privacy, noise insulation and noise absorption. The lineaCube offers the required acoustic privacy and an ideal working climate. Alongside completely transparent walls, combinations with blinds, privacy glass and closed walls are also possible.

Complete transparency and acoustic privacy

The lineaCube from Maars is unique, thanks to its minimalist design and the completely self-supporting structure with recessed ceiling and double glazing. Sound insulation and absorption are ideal. The lineaCube is an independent space with its own ventilation, acoustic insulation and absorption, with power, data, audio and lighting integrated into the ceiling.

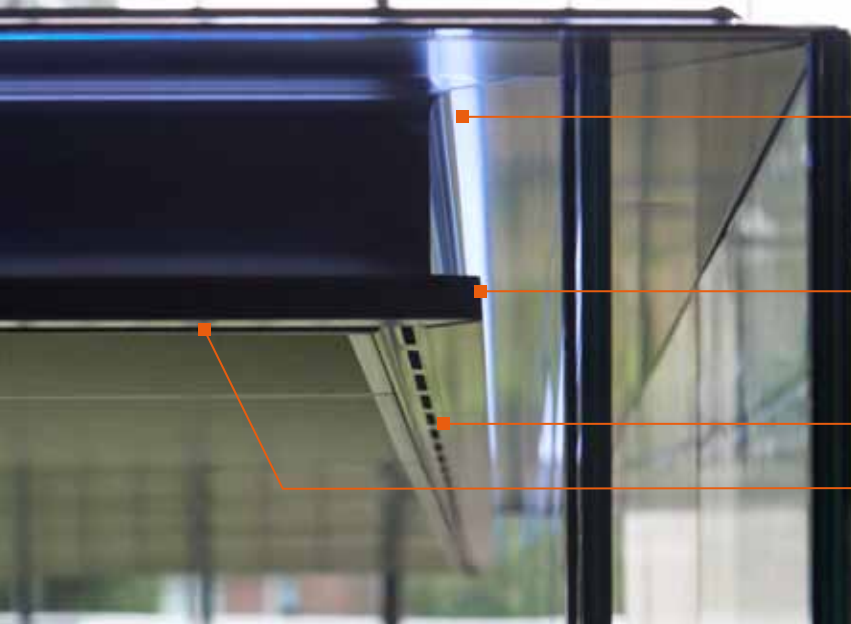

linea Cube

Lowest sections in the world.

Integrated LED mood lighting.

LED lighting

Suspension rail

Ventilation (supply)

Ventilation (return)

Minimalist design

Due to the absence of vertical profiles, even at the corners, the lineaCube is completely transparent.

- Lowest sections in the world with a height of only 22mm, / less than 1 inch
- Continuous lining
- Recessed and underlying ceiling
- The walls and doors have flush glazing

The lineaCube can also be combined with steel panels or one of the other materials from the vast selection of modular partitions & Living Options within the Maars collection.

Recessed ceiling

In the lineaCube, the ceiling is recessed into the double glazing. The flush glazing offers seamless lines, resulting in a clean and transparent design.

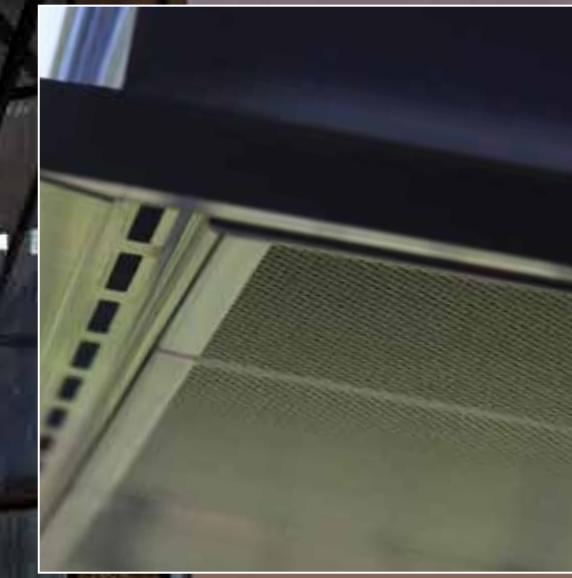

- Maximum sound insulation and absorption
- Integrated indirect LED mood lighting along the ceiling contours
- Direct lighting; spots or hanging lamps
- Integrated sprinkler, fire alarm and/or movement sensors
- Steel Maars ceiling construction or customized ceiling
- Optional stretch ceiling

Self-supporting
'Thanks to my maximum transparency, with no vertical profiles, I appear to float in space. My aesthetic is unique.'

Design it your way

AL JURAJID

Acoustic ceiling.

Partial solid wall with integrated multimedia panel.

Concealed hinges.

Whiteboard panels.

Integral suspension rail.

Ideal working climate

The lineaCube offers an ideal working climate thanks to the concealed and fully integrated ventilation and air extraction within the ceiling.

Acoustic properties

- High sound insulation values up to 48 dB
- Very good acoustic insulation with a reverberation time of 0.5 seconds. This has been demonstrated to be the ideal value

Options

- Option to integrate double-glazed design door or sliding door
- Integrated hanging rail for accessories, such as absorber cabinets and paintings along the ceiling contours
- Integration of Living Options, such as multimedia, sound panels, whiteboards

Modularity for tailored solutions

The layout of the lineaCube is open to endless variation - from a one-person office to a consulting room with separate compartments. lineaCube offers significant flexibility in dimensions:

- Unlimited length
- Width up to 4 metres / 13 ft.
- Height up to 3 metres / 10 ft.

- Concept boardroom.
- Concept meeting room.
- Concept consulting rooms.
- Concept focus workstations.
